

EnterpriseSCHEDULE

Predefined Banner Workflow Processes using EnterpriseSCHEDULE from ISE Inc

ISE provides a family of predefined Banner job templates, actual jobs and layouts for viewing and tracking jobs and job streams. You may choose to use the kits to educate yourself on the many options available and build your own Banner kit with ISE's assistance. These job lists are provided to show the scope of Banner integration in EnterpriseSCHEDULE. Speak with an ISE representative to learn how your Banner workflow can be integrated into EnterpriseSCHEDULE.
